My Weekend.

611Estee 陳伊軒.

I went to Miramar shopping mall last weekend. I bought some new clothes there. First, I went to Uniqlo and bought a new coat there because of the cold weather. Second, I went to Adidas and I bought a T-shirt there. Third, I went to Roots. I saw a pink sweater and I liked it very much. It's a pity that I can't find my size so I didn't buy it. .

It was a happy weekend for me. How about you?.

A Bad Day.

610Jenny 劉又甄.

I'm here in Taiwan. There was a big earthquake. This earthquake caused a lot of buildings to fall down..

A lot of people were hurt. Some people who were in the buildings can't get out. They started to cry. I felt relieved because it was very dangerous but I didn't die. But I also felt sad because many people passed away. I live on the fifth floor. When it shook I was very scared. Many people got hurt, so we need medical assistance. I saw many doctors and police officers. The earthquake caused fire, so we also had fire fighters here. There were many people waiting to find their family members. My grandfather and grandmother are at Changhua. They donated a lot of money, cooked food and prepared water for the homeless. They are so kind and generous..

I do hope there are no more earthquakes. I also hope everyone can be safe and sound next time when there is a big earthquake. .

Things I Hope Will Never Be Done By Robot.

六年四班 劉旻敏.

Robots are made by engineers, they helped humans a lot. Robots can be waiters, war photographers, and astronauts. They can do the most dangerous job for people, to help keep us from getting hurt. They can also do the boring jobs we just don't want to do. It looks like we really need robots, but there are some things I hope will never be done by robots. That's what I'm going to tell you about now..

If you have a robot, remember, if a robot is taking care of your baby, your baby will be in danger! Maybe the robots will shake the babies really hard. What if the baby gets hurt? If the babies were hungry, they may feed them too much. Robots don't eat, so they don't know how much a baby can eat. .

This may make the babies sick. If a baby cries, what will the robots do? How does a robot know what a robot will do? This is dangerous..

If you need a police officer, don't call the robots. Some people won't care what it says, because robots are not alive. If someone destroys it, they will just pay a fine. They just crush the robots everyday. Poor robots. If people are fighting, the robots may hurt the fighters. Who knows? Do you think all the robots are kind and quiet? That's wrong! Robots can be really scary, too! They should never be a police..

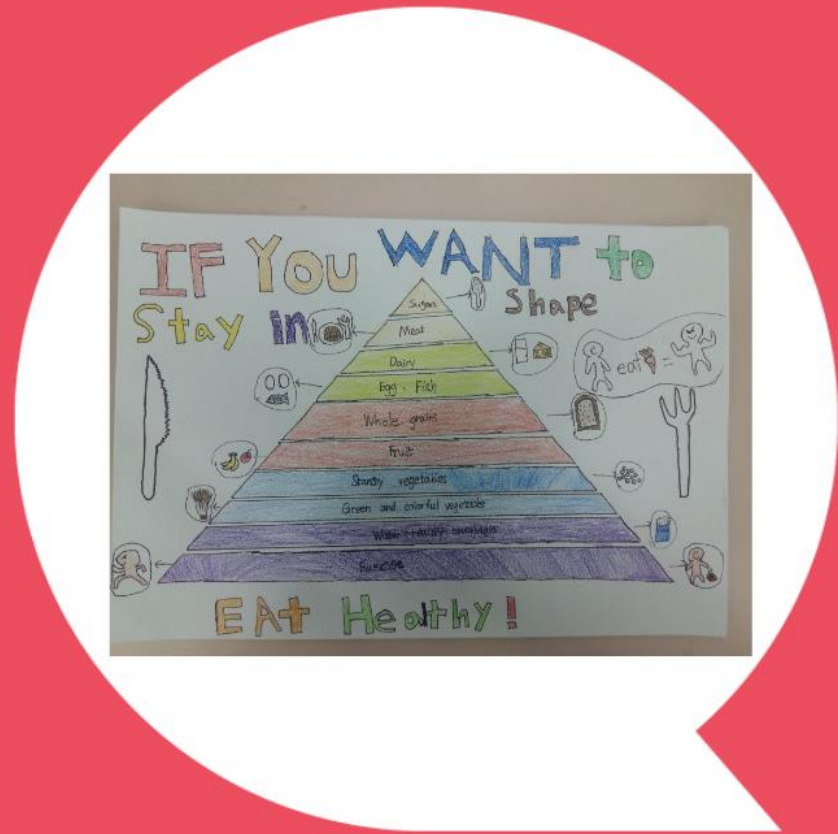

The most important thing is, do not let a robot be a teacher! If a robot is a teacher, all the students will hate their teacher! Why? Because they will just speak and speak. Children will be bored. If I could choose my teacher, I would choose the funniest one. Then, my teacher will tell funny stories to me. Students will be playing, laughing, talking and yelling. The robot teachers won't care. They will just continue teaching, and the classroom will be really noisy. If the teacher is a robot, all the students will not be happy. Robots don't have feelings, so they won't love their students, and the students won't like their teacher..

Now, robots help a lot, but maybe we can do things by ourself. If we use the robots for everything, people will be lazy. No pain, no gain. Sometimes we may be in danger without a robot, but if we keep trying, everything is going to be fine. .

FUNNY BONES By Janet and Allan Ahlberg

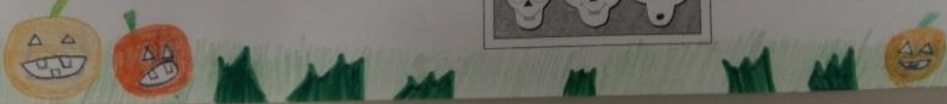

Class: 六〇- Number: 11
Name: 王怡婷
Rison

First In the dark dark town, street, house, and cellar. There was a big skeleton, a little skeleton and a dog skeleton. They want to frighten somebody.

Next They walked past the houses, the shops, the zoo, the police station and went into the park. They walked round the pond, the tennis courts, and up to the swings. The dog chased the stick, and tripped over a park bench and ended up as a little of bones. And they put it together.

THEN They went into the town to frighten somebody. But only skeleton animals were awake. They decided to frighten each other. And the little skeleton frightened them. They hid round corners, climbed up lamp posts, jumped out of dustbins and frightened each other.

Last They went all the way home.
In the dark dark town, street, house, and cellar. Lived a big skeleton, a little skeleton and a big skeleton.

FUNNY BONES
